TITLE OF INVENTION: WIRELESS COMMUNICATIONS INVISIBLE PROXY AND HOOKING SYSTEMS AND METHODS

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	YES	\$720	\$300	\$0	\$1020	12/08/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 501 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 501 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

EXAMINER'S AMENDMENT

This action is in response to Applicant's amendment filed April 30, 2008. Claim 16 has been cancelled. Claims 17-21 have been newly added. Claims 1, 6-9, 11,13 and 17-21 are pending in the application.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with H. Dale Langley, Jr. (Reg. No. 35,927) on August 25, 2008.

The application has been amended as follows:

Claim 8: A method of wireless communications, wherein a client device communicates wirelessly with a server computer, and wherein the client device runs a standard program using a standard format data, comprising the steps of:

serving a first information by the server computer to the client device according to a specialized protocol receivable by the client device, the first information comprising a non-standard format data because of the specialized protocol;

receiving the first information by the client device according to the specialized protocol;

determining at the client device that the first information comprises the non-standard format data; and

translating at the client device the non-standard format data to the standard data useable by the standard program, wherein the client device comprises a hooking layer, the hooking layer comprising:

a first specialized socket of the client device for receiving a first data per a non-standard optimized wireless protocol and translating at the client device the first data per the non-standard optimized wireless protocol to a program data, the program data being an input and output of the program, according to a standard network protocol, for use by the program;

a second specialized socket of the client device for selectively translating at the client device the program data per the standard network protocol to a second data per the non-standard optimized wireless protocol, for selective transmission of the second data per the non-standard optimized wireless protocol to the server computer over the wireless communication link; and

a switch of the client device for selecting the first specialized socket and the second specialized socket, respectively, when the client device is communicating the first data and the second data, respectively, with the server computer according to the non-standard optimized wireless protocol over the wireless communication link.

Art Unit: 2143

Claim 11: A wireless communications device, comprising:

a specialized communications protocol receiver of a client device for receiving wireless communications having a specialized protocol format, the specialized protocol format for wirelessly communicating with a server computer capable of communications via the specialized protocol format;

an application program of the client device communicatively connected to the specialized communications protocol receiver, the application program operates with a standard data different from the non-standard data; and

a hooking layer of the client device communicatively connected to the specialized communications protocol receiver and the application program, the hooking layer receives and translates the non-standard data to the standard data useable by the application program of the client device;

wherein the hooking layer is included in the client device and the hooking directly translates the non-standard data at the client device;

wherein the hooking layer comprises:

a first specialized socket of the client device for receiving a first data per a non-standard optimized wireless protocol and translating at the client device the first data per the non-standard optimized wireless protocol to a program data, the program data being an input and output of the program, according to a standard network protocol, for use by the program;

Art Unit: 2143

a second specialized socket of the client device for selectively translating at the client device the program data per the standard network protocol to a second data per the non-standard optimized wireless protocol, for selective transmission of the second data per the non-standard optimized wireless protocol to the server computer over the wireless communication link; and

a switch of the client device for selecting the first specialized socket and the second specialized socket, respectively, when the client device is communicating the first data and the second data, respectively, with the server computer according to the non-standard optimized wireless protocol over the wireless communication link.

Claim 15: A method of communications between a server and a client over a wireless channel, comprising the steps of:

transmitting a specialized data via a specialized protocol in communications between the client and the server;

receiving the specialized data via the specialized protocol in communications between the client and the server;

hooking at the client the specialized data received by the client from the server in communications from the server to the client, to discern between an application standard data of the specialized data and an application non-standard data of the specialized data;

wherein the client comprises a hooking layer, the hooking layer comprising:

a first specialized socket of the client device for receiving a first data per a non-standard optimized wireless protocol and translating at the client device the first data per the non-standard optimized wireless protocol to a program data, the program data being an input and output of the program, according to a standard network protocol, for use by the program;

a second specialized socket of the client device for selectively translating at the client device the program data per the standard network protocol to a second data per the non-standard optimized wireless protocol, for selective transmission of the second data per the non-standard optimized wireless protocol to the server computer over the wireless communication link; and

a switch of the client device for selecting the first specialized socket and the second specialized socket, respectively, when the client device is communicating the first data and the second data, respectively, with the server computer according to the non-standard optimized wireless protocol over the wireless communication link; and

operating an application of the client, the application operable with the application standard data, by translating at the client the application non-standard data to the application standard data for the application.

The following is an examiner's statement of reasons for allowance: independent claims have been amended to overcome the 112, 1st and 2nd paragraph rejections. The

Art Unit: 2143

independent claims have also been amended to specifically and distinctly point out that communications between client and server are over wireless link according to non-standard specialized wireless protocols including non-standard data. At the client, these non-standard optimized wireless protocols including non-standard data are selectively hooked using specialized sockets and made available for the application program as standard data for the application program. In combination with every elements in the claims, the prior art of record does not teach the "hooking layer" as amended in the claims. Newly added claims are allowed fore being dependent on allowed claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALINA N. BOUTAH whose telephone number is (571)272-3908. The examiner can normally be reached on Monday-Thursday (9:00 am - 5:00 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tonia L.M. Dollinger can be reached on 571-272-4170. The fax phone
